

Shrikant Shivaji Lohar

Consultant

PROFILE SUMMARY

Full Stack Developer with 4+ years of expertise in designing, developing, and maintaining scalable web applications using Java, Spring Boot, ReactJS, and SQL. Skilled in building RESTful APIs, microservices architectures, and seamless frontend-backend integration to enhance application performance. Proficient in Spring Data JPA, Hibernate, MySQL, PostgreSQL, Maven, Git, and Agile methodologies. Experienced in CI/CD pipelines, Docker, Kubernetes, Kafka, Redis, Elasticsearch, and cloud deployments. Adept at troubleshooting, debugging, code reviews, and performance tuning. Strong collaborator in cross-functional Agile/Scrum teams, effectively translating business requirements into robust technical solutions for high-quality software delivery.

WORK EXPERIENCE

- Mar 2025 - Present

Consultant
T-Systems ICT India Pvt Ltd

Develop and maintain scalable web applications using Java, Spring Boot, and ReactJS. Design and implement RESTful APIs, develop responsive user interfaces, and integrate frontend and backend components. Work on microservices architecture, database design, and application performance optimization. Collaborate with cross-functional teams to gather requirements, deliver end-to-end features, and ensure code quality through testing and reviews. Utilize tools such as Maven, Git, Docker, and CI/CD pipelines for efficient development and deployment. Participate in Agile/Scrum ceremonies and contribute to continuous improvement of application architecture, security, and user experience.

Jan 2023 - Jan 2025

QA Analyst
Zimetrics Technologies

Developed and maintained REST APIs using Spring Boot for core application features Implemented business logic for data processing and backend functionality Integrated external data sources and ensured smooth API communication Enhanced and maintained UI components using ReactJS Performed bug fixing and feature enhancements across frontend and backend Participated in requirement analysis, design, and implementation Collaborated with cross-functional teams for end-to-end feature delivery

Apr 2022 - Jan 2023 Software Test Engineer

Infinite Computer Solutions

Developed and maintained reusable automation frameworks using Java, focusing on modular and scalable design Built data-driven framework components to support dynamic input handling and execution Designed and implemented utility libraries and common functions to improve code reusability Worked on framework architecture enhancements using TestNG and Maven Integrated framework execution with CI/CD pipelines for automated builds and deployments Developed SQL scripts for data validation and backend support Implemented API integration and validation using Postman Participated in requirement analysis and Agile (Scrum) development process Collaborated with team members to improve framework efficiency and maintainability Created and maintained documentation for framework usage and components Worked on cross-browser execution support and parallel execution configuration Used Git for version control and code management

Projects

397 Days

Inpen 2.0

The main goal of the project is to comprehensive diabetes management app that offers graphical therapy visuals, insulin dose calculations based on glucose and carbs, reminders for insulin intake, automatic data import from CGMs/BGMs, and easy sharing of therapy reports with healthcare providers.

275 Days

TATA PLAY BINGE

Goal - The main goal of the project is to provide entertainment to the user over the Internet. Users can get all types of content in one platform with MVP in an agile environment.
